Goals

- Can recognise and explain the specific order of adjectives and adverbs in complex sentences.
- Can write a longer description using multiple adjectives and adverbs.

Claire skipped **happily** towards her **extra** English lesson, humming **excitedly** to herself and wondering about what she was going to learn in the **interesting, hour-long** class.

Preview and warm-up

- This lesson is about the placement of adjectives and adverbs in complex sentences.

An **old, happy** lady or a **happy, old** lady?

Placement of adjectives

- Ask every native English speaker which is correct on the previous page and they will immediately be able to tell you. But they more than likely won't be able to tell you why. Native speakers know the **order of adjectives** instinctively, but learners of English have to be taught.

A **happy**, **old** lady.

Order of adjectives

- When we want to describe something using **more than one adjective** we must follow a certain order in English.
- To do otherwise is grammatically wrong and will sound unnatural. On the next two pages are the **ten types of adjectives** and their **order**.

Order	Attribute	Example
1	opinion	ugly, unusual, wonderful
2	size	big, tiny, tall
3	physical quality	thick, smooth, tidy
4	shape	round, square, circular
5	age	old, new, ancient

Order of adjectives

- The order of adjectives continued.

Order	Attribute	Example
6	colour	red, green, brown
7	origin	French, Japanese, British
8	material	wooden, silk, cotton
9	type	three-sided, o-shaped, general-purpose
10	purpose	sharpening, cleaning, cooking

Order of adjectives

- Of course, we never use all ten types of adjectives in one sentence, but we can come close.

An annoying, small, circular, black, Chinese alarm clock wakes me up every day.

Correct the sentences with adjectives in the wrong order

Attributive and predicative adjectives

- Most adjectives can be **attributive** and **predicative**.

The black cat.	The cat was black .
The tall man.	The man looked tall .
A happy boy.	The boy seemed happy .

Attributive and predicative adjectives

Find 5 mistakes

Find 5 mistakes with attributive or predicative adjectives in the text. When correcting the mistakes, you may need to make changes to the surrounding text. Once you've identified mistakes, explain how you would fix each one.

Finally, the day arrived when my sister elder was getting married. She was absolutely over the moon about it, but she was also feeling nervous the night before. In fact, my awake sister was found at 4am, checking that her dress was in good shape. It turned out that she had good reason to worry: after my very caring but rather scatter-brained mother had cooked breakfast for us, she left the stove on and we returned to the kitchen to find an ablaze room. We doused the flames but my sister's dress had caught fire and the hole was little but noticeable. My bereft sister cried and cried.

Identifying adjectives

Identify the attributive and predicative adjectives in these sentences.

1. The big, brown bear was asleep in his cave.
2. The most recent house that we wanted to buy was beautiful but overpriced.
3. The gold medal that you won for that difficult contest was well-deserved.
4. That fancy food is really expensive but delicious.
5. The board members who were present voted against the incumbent chairman.
6. The mere thought of skydiving was so terrifying that I backed out.

Fill in the gaps

Here is a definition of civilisation with the adjectives removed. Read through the text and put the adjectives back in. Then, discuss with your teacher whether you agree with this definition of civilisation.

Civilisation

What exactly is civilisation? How is it defined and what are its _____ characteristics? Civilisation is generally defined as an _____ state of human society, containing highly _____ forms of government, culture and societal norms.
