Extreme experiences

For many people, simply watching a horror film or riding a rollercoaster is a terrifying experience, while others actively seek more extreme thrills just for the fun of it!

We asked our readers to share some of their thrilling experiences – read on to find out about a slightly unusual way to relax, and why the scariest thing about sky-diving is not what you might expect...

Is there any unfamiliar vocabulary in the text?
Discuss with your teacher and classmates.

What are some typical activities that people do to relax?

What do you think the scariest thing about sky-diving is?

Reading

Read about Elliot's experience and answer the questions below.

Elliot (34), remembers the first time he tried sky-diving...

The whole time in the plane, I was terrified. My stomach was in knots and I thought: why am I doing this?! But then we jumped, and the fear just disappeared. You're living fully in the moment. You don't have time to think!

I've done it five times now and each time has been more amazing than the last. And, of course, it's so satisfying to know that you've tested your limits and come out safe on the other side!

What physical sensation does Elliot mention?

How many times has Elliot gone sky-diving?

Why does Elliot find sky-diving satisfying?

**My stomach was in
knots the whole time
on the plane!**

Have you ever experienced a feeling like
this?

Is there a similar phrase in your language?

Reading

Read about Jane's experience and answer the questions below.

Jane (25), is a fan of ice-swimming...

I was first introduced to ice-swimming while studying in Finland three years ago. It might sound strange, but I find it really relaxing. After the initial shock, you get this warm, tingly feeling throughout your body. I calm down and stop thinking for a while. For me, it's like a form of meditation.

People are often surprised when I tell them about the health benefits – for example, if you do it regularly, it's great for the immune system and it also helps to reduce stress!

When did Jane start ice-swimming?

What activity does Jane compare ice-swimming to?

Why are people surprised when Jane talks about her hobby?

I get this warm, **tingly** feeling throughout my body.

A **tingly** feeling is a physical feeling – it's like lots of tiny, sharp points are pressing into your body.

Have you ever experienced this feeling after swimming in very cold water? Do you think it sounds pleasant or unpleasant?

Reflect on the texts

**Was any of the
information in the texts
surprising to you?**

**Have you ever tried any of these
activities?**

If not, would you like to?
